

## Prepare your BOAT on your trailer for Transporter

1. Your trailer must be registered, roadworthy and all lights and brakes operating.
2. All items inside your boat such as galley utensils, plates, cups etc. should be PROPERLY secured.
3. All depth sounders, compasses, etc. should be removed and secured inside the craft. All ports, hatches, doors, cabinet doors, drawers, lockers and windows should be locked shut and the locking device taped over.
4. To prevent water damage to cloth or canvas covers, tops and side curtains should be removed prior to shipment. Covers can rip or shred or cause cracks and scratches to the boat while in transit. Anchor Motor Freight assumes no responsibility for canvas covers or tops, which remain topside during shipment. Please make sure covers or tarps are removed and secured in boat prior to pickup.
5. Personal belongings and equipment must be itemized and verified by our driver prior to shipment. We cannot assume responsibility for missing items not fully accounted for in writing.
6. For safety consideration the fuel tank should be no more than  $\frac{1}{4}$  full, fresh water tank should be drained and holding tank should be empty and sanitized.
7. Plastic or plexiglass fly bridge windshields should be removed and stored inside the craft.
8. The transportation of sailboats involves a few additional requirements. Standing rigging, turnbuckles, mastheads, bow lights, antennas, spreaders, wind indicators, wires and mast winches should be removed from the mast - after it is unstepped - and prior to shipment. We do not assume liability for damage attributable to rubbing or chafing by equipment left on the mast during shipment.
9. Loading and unloading the boat on / off of our trailer is the responsibility of the owner of the boat. Owners must make their own arrangements to pay for these services with the marina or storage facility. Power boats transported on the boat owners trailer can be wet loaded or launched provided there is a boat ramp nearby. We can water launch your boat for an extra charge of \$75. Sail boats cannot be wet loaded or launched.
10. Oversized vessels will need special permits. Any vessel or vessel/trailer combination over 8'6" wide will need wide load / over sized permits. These are required for each state that we travel through and are ordered the day of your transport (they are generally only good for 7 days). Our driver will provide you with the actual amount of the permits upon delivery for immediate reimbursement.

We would be happy to answer any questions you might have concerning the transportation of your boat. Please do not hesitate to contact us with any other questions.
