

Prepare your vehicle for Transporter

1. Make sure that you have a complete set of keys for the auto shipping company, and a full extra set for yourself. DO NOT turn over both sets to the driver.
2. If you are transporting a classic, custom, rare, exotic, or otherwise expensive vehicle, go for the enclosed transport if you can... it will be worth the extra cost!
3. Clean your vehicle before it is picked up by the transporter to ensure a proper inspection and clear documentation of your cars physical condition- if it is dirty, we cannot perform an inspection and cannot be held liable for "hidden scratches".
4. Check your battery to make sure it's fully charged and securely mounted.
5. Check the obvious places for fluid leaks; oil, transmission fluid, power steering, etc.
6. If possible, disable and or disconnect your car alarm.
7. Prepare your vehicle for your new climate before you ship it; you might consider changing the oil, coolant, and possibly other fluids.
8. Remove and/or retract your car antenna(s).
9. Remove rear spoilers, grill covers, exterior spare tire and all car covers.
10. Remove all personal items from your automobile.
11. We are not a moving company commonly referred to as "Household Goods Carriers". We are not licensed or insured to transport your personal items. Please do not load up the back seat or trunk with your possessions.
12. Drive your fuel tank down to a maximum of ¼ tank before the vehicle is picked up.
13. Remove any audio equipment, car phones and garage door openers that aren't built in.

We would be happy to answer any questions you might have concerning the transportation of your vehicle. Please do not hesitate to contact us with any other questions.
